Microfilm Roll T-7

INTRODUCTION

This transcription of the 1860 Federal Census of Clinton County, Ohio lists the following information in the order in which it is given on the official census pages:

First Column

<u>Page number</u> is the handwritten number assigned at the top corner of each census sheet page (example, "Page No. 3" = P3).

Dwelling number assigned for each home visited.

Family number. Usually dwelling number and family number are the same, but could be different. In this transcription, they are separated by a "/", (example, 12/12).

Second Column

Name of every person whose usual place of abode on June 1, 1860, was in the family. Surnames are capitalized and listed first, followed by the indented, given names of each person with that surname. The first person listed is assumed to be the head of household. Other persons in the family with different surnames are listed by capitalized surname, and then by given names. Indented entries under each surname belong with that surname.

Age

Sex

Race In the enumeration for Clinton County, "W" for whites, "B" for blacks, and "M" for mulattos has been used.

<u>Profession, occupation or trade for each male over 15</u> is usually listed. Naturally there would not be any entry in this category for women or children. A "—" means that no occupational category was given.

Value of real estate owned is sometimes given. A "—" means that none was given.

<u>Value of Personal Property</u> is sometimes given. A "— " means that none was given.

State, territory or country where each individual was born is usually indicated.

An "*" preceding an entry means that particular entry was very difficult to decode and the researcher may want to check the microfilm for that particular record.

Certain other information in the original census schedules, i.e., whether married within the year, schooling, literacy and physical or mental impairment of the individual has been omitted from this transcription. However, the transcriptions does note "blind", "deaf", "epileptic" as those conditions may be of medical value to researchers.

Care has been exercised to transcribe faithfully the information (including known factual errors) appearing on the microfilm of the original census schedules.

1860 Census of Clinton County, Ohio

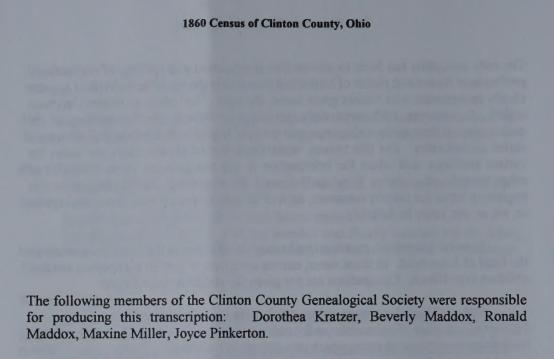

The only exception has been to standardize punctuation and spelling of occupations/ professions/ trades and places of birth. In cases where the sex of an individual appears clearly inconsistent with his/her given name, the term, "sic" (thus; as written) has been added. In common with most early genealogical records, the handwriting of the enumerators is frequently ambiguous, and the spelling of both family and given names varies considerably. For this reason, researchers should always check the index for variant spellings, and when the information in the transcription varies with that of other records, the census film itself should be examined. Substituting a similar beginning letter for certain surnames, as well as experimenting with name endings (s, es, en, er, etc.) may be helpful.

In some townships, enumerators have given the spouse the same occupation as the head of household. In those cases, entries are given as written for spouses and any children over fifteen. Occupations are not given for children under fifteen.

States of birth have been abbreviated using today's standard two-letter system. Following is a table of abbreviations for states and territories of the United States, and for foreign countries and states which may appear in the census:
